EBRPD Sunol-Ohlone Negative Declaration

The Tri-Valley Group of the Sierra Club believes that a negative declaration for the Land Use Plan for the Ohlone/Sunol Regional Wilderness Preserves is insufficient and requires a full EIR to address all significant impacts, and to study a wide spectrum of alternatives including Alternative W and other alternatives that support the wilderness concept in the Regional Preserves. We further request that the EIR include the effects of the Apperson Ridge Quarry on the Preserves because of the Park Districts' involvement in the original quarry proposal.
